

Racing	Electric	Hobbies	fuel	Issues
<p>Gas engines can make a high power-to-weight ratio, allowing for higher speeds, which are perfect for racing.</p> <p>Bamwitdabuck</p>	<p>Day to day people want more efficient cars like electric cars.</p> <p>Bamwitdabuck</p>	<p>Motorcycle Riding</p> <p>Bamwitdabuck</p>	<p>More affordable gas stations</p> <p>Bamwitdabuck</p>	<p>some engines are not as reliable as others and causes more problems</p> <p>Bamwitdabuck</p>
<p>Gas engines offer many tuning options. Engineers can tune aspects like fuel mixture and timing to maximize performance for different tracks and conditions.</p> <p>Bamwitdabuck</p>	<p>Electric vehicles reducing air pollution and greenhouse gas emissions, which is crucial in the fight against climate change.</p> <p>Bamwitdabuck</p>	<p>Automotive Restoration</p> <p>Bamwitdabuck</p>	<p>faster to fuel up than charge your car</p> <p>Bamwitdabuck</p>	<p>Efficiency can be a problem as some engines are not as efficient as others.</p> <p>Bamwitdabuck</p>
<p>Gas engines can be lighter than some alternatives, such as electric engines or hybrid systems, which is an important factor in race car design.</p> <p>Bamwitdabuck</p>	<p>EVs generally have lower operating costs compared to gas cars, and EVs have fewer moving parts, which can lead to reduced maintenance expenses.</p> <p>Bamwitdabuck</p>	<p>engine building</p> <p>Bamwitdabuck</p>	<p>more fuel types for different aspects and engines.</p> <p>Bamwitdabuck</p>	<p>If your runs off a certain fuel like E85 only certain gas stations have the correct fuel for your car.</p> <p>Bamwitdabuck</p>
<p>Gasoline is widely available and understood in the racing community, making it easier to source and use in various racing series.</p> <p>Bamwitdabuck</p>	<p>Battery technology has improved significantly, resulting in longer ranges, and faster charging times</p> <p>Bamwitdabuck</p>	<p>drag racing</p> <p>Bamwitdabuck</p>	<p>diesel fuel used for trucks a powerful engines used to to tow and pull stuff.</p> <p>Bamwitdabuck</p>	<p>keeping maintenance up or for example not changing the oils in your car can cause the engine to fail.</p> <p>Bamwitdabuck</p>
<p>Many racing series have a long history of using gas engines, creating a competitive culture around their use. Drivers and teams are familiar with the technology and can rely on established strategies and practices.</p> <p>Bamwitdabuck</p>	<p>Electricity is often cheaper than gasoline</p> <p>Bamwitdabuck</p>	<p>model air plane flying</p> <p>Bamwitdabuck</p>	<p>recycled oils can be used to turn into fuels.</p> <p>Bamwitdabuck</p>	<p>Hard driving: some care cannot take hard driving like other car that are meant for it like muscle cars. And will damage the engine the harder you drive in some instances.</p> <p>Bamwitdabuck</p>
